

# One Data GmbH

**"You can't improve what you don't measure."**

**Ensure data quality, integrity and accessibility with One Data, connect data silos and gain measurable business value**

One Data is a German software company founded in Passau and a leading name in the use of applied artificial intelligence (AI). With the first available AI-powered Data Product Builder, One Data redefines the development of data products, specifically designed for innovative and collaborative data teams.

This enables such teams to create and use comprehensive data products, establish a data-driven culture and unlock the full potential of data. Data products built in One Data transform raw data into actionable insights, empowering businesses to make informed decisions, optimize processes, and drive innovation. The Data Product Builder streamlines the development process, reducing time-to-market for data products, ensures scalability and flexibility in handling diverse data sources, and ultimately unlocks the value of data assets more efficiently.

With the establishment of a Data Product Marketplace, One Data strategically dismantles data silos, creating a central space for data collaboration and seamless sharing. The company concentrates on bridging the gap between data experts and non-technical business users, enabling them to build, manage, and share data products efficiently while ensuring interoperability and high data quality. The outcomes include more stable supply chains, more accurate forecasts, faster R&D processes, and more efficient data teams.

One Data is an owner-managed company, with a management that includes company founder Dr. Andreas Böhm, Dr. Stefan Roskos and Dr. Gregor Wiest. The international team of over 200 employees from around 30 nations works at locations in Passau, Munich, Frankfurt am Main and Berlin. In addition to Opti Invest green GmbH, Salvia GmbH has been an investor since 2021 – an investment company owned by Helmut Jeggler, who has been an investor and supervisory board member at BioNTech SE since 2017.
