

# One Data GmbH

## Company Overview

One Data is a German software company founded in 2013 by Dr. Andreas Böhm in Passau, Germany. Its mission is to transform legacy data into a trusted foundation for reliable, scalable, and actionable AI. This mission addresses one of the biggest bottlenecks of enterprise AI: unreliable data. As organizations move quickly to deploy AI, the quality and trustworthiness of their data becomes critical. Without trusted data, AI initiatives can create risk instead of value.

One Data solves this challenge by enabling organizations to turn fragmented legacy data into trusted, reusable data products. The One Data software platform connects business and data teams in a shared environment, providing trust and transparency, alignment, and automation from legacy data to trusted data products. Teams can understand their data landscape, define clear business requirements, document quality, lineage, and context, and automate delivery across existing target systems such as Snowflake, dbt, and Databricks.

By creating a shared trusted data layer, One Data aligns business and data users across the organization. This helps enterprises reduce rework, improve governance, and make better use of their existing data stacks. As a result, organizations can build reliable KPIs, trustworthy reporting, scalable automation, and AI systems that operate on data they can trust – enabling more confident decisions and better business outcomes.

One Data works with large enterprises from industries such as automotive, manufacturing, financial services, healthcare, and public sector.

## Vision

One Data's vision is a world where responsible AI runs on trusted data.

## Mission

One Data's mission is to transform legacy data into a trusted foundation for reliable, scalable, and actionable AI.

## Leadership

One Data is an owner-managed company, with a management team that includes company founder Dr. Andreas Böhm and Dr. Stefan Roskos. The international team of over 150 employees from around 30 nations works at locations in Passau, Munich, Frankfurt am Main, and Berlin. In addition to Opti Invest green GmbH, Salvia GmbH has been an investor since 2021 – an investment company owned by Helmut Jeggle, who has been an investor and supervisory board member at BioNTech SE since 2017. In 2024, One Data completed a EUR 32 million Series B extension round, co-led by leading European deep tech and software investors Vsquared Ventures, Molten Ventures, and HV Capital, further strengthening the company's financial backing and strategic network for its global growth ambitions.

## Key Benefits

- **Turn unreliable legacy data into quality-assured, business-aligned data products**
- **Create a trusted foundation for reliable KPIs, reporting, automation, and AI**
- **Reduce rework and accelerate delivery by aligning business and data teams**
- **Improve governance through transparent metadata, data contracts, and lifecycle management**

# Milestones and Successes

- 2026** —————> One Data launches its new AI-native platform version for Trusted Data in enterprise environments, helping companies transform fragmented data landscapes into trusted data products for analytics, automation, and AI.
- 2025** —————> One Data has once again been named a Sample Vendor for Data Products in the Gartner® Hype Cycle™ for Data Management 2025, and also recognized as a Sample Vendor for Data Contracts. In addition, One Data has been acknowledged as a “Business Value Leader” in the new BARC Data Intelligence, Catalogs and Marketplaces Survey 25.
- 2024** —————> One Data was mentioned in the Gartner® Hype Cycle™ for Data Management as a Sample Vendor for Data Products. In July, One Data successfully completed a Series B Extension funding round, raising EUR 32M. Leading European deep tech and software investors Vsquared Ventures, Molten Ventures and HV Capital were co-leading this funding round with the support of existing investors.
- 2023** —————> ONE LOGIC changes its company name to “One Data”, launches the first available AI-powered Data Product Builder and redefines the development of data products.
- 2022** —————> ONE LOGIC opens an office in Berlin. Meanwhile, 200 employees from 30 nations are part of the international team. ONE LOGIC has a standardized enabling technology for the visualization of data landscapes. In addition, ONE LOGIC responds to current geopolitical challenges in global supply chains with its supply chain solutions.
- 2021** —————> ONE LOGIC is mentioned by **Gartner®** in three **reports**, including the „Cool Vendors™ in AI Core Technologies“ report 2021. Series-B financing hits two-digit million Euros and investor Salvia Ltd. comes on board.
- 2020** —————> ONE LOGIC wins the “**Großen Preis des Mittelstandes**”.
- 2018** —————> ONE LOGIC becomes one of the „**Bavaria Best 50**”.
- 2016** —————> The office in Munich opens.  
ONE LOGIC organizes the first Passauer Data Science Conference (PasDaS).
- 2015** —————> “Go Live” of the first version of the company’s own platform.
- 2013** —————> Dr. Andreas Böhm founds ONE LOGIC (later One Data) in a small office in Passau.
